

Students Earn Money, Credit, & Experience

Student research grants & internships are awarded each year to undergraduate and graduate university students through the American Public Power Association's Demonstration of Energy-Efficient Developments (DEED) Program.

Ten \$4000 Student Research Grants/Internships are available to students to conduct research on energy related projects or work at DEED member utilities. A mid-project report, final report and abstract are required. **Deadline: Oct 15, 2009 & Feb 15, 2010**

One \$5000 Technical Design Project (Research Grant) is available to a student or group of students working on an energy related project. This scholarship is geared towards engineering students working on their senior project. A mid-project report, final report and abstract are required. Additional travel expenses are also included for the student(s) to present their work at APPA's Engineering and Operations Technical Conference held each spring. **Deadline: Oct 15 annually**

For more information and an application visit APPA's website at <http://www.APPAnet.org/deed.cfm> then choose *Funding Opportunities* from the left bar.
