

Daniel Trombley is an Engineering Associate for the American Council for an Energy-Efficient Economy (ACEEE) focusing on industrial energy efficiency. He works on assessing the energy efficiency potential of industries for state studies and characterizing emerging industrial technologies. He also helps develop and assess federal and state energy efficiency policies for the industrial sector.

Prior to joining ACEEE in 2008, Daniel worked for 2 years in the US DOE Industrial Assessment Center program, where he performed over 30 energy assessments on industrial sites and wrote over 100 energy savings recommendations and technical analyses. Daniel received both a Bachelors and Masters Degree in Mechanical Engineering from the University of Dayton in 2005 and 2007, respectively.
